About Me

Currently, I am working with a UFO Cine Media Network where I am wholly responsible for maintaining and securing digital data. Also responsible for day to day activity regarding data manipulation. I have done my Full Stack Developer course and have good knowledge of frontend and backend technologies. I have a strong passion for creating efficient, scalable, and user-friendly single page web applications. With a solid foundation in JavaScript and a deep understanding of the React ecosystem, I specialize in developing **responsive and optimized** applications that provide seamless user experiences. I am Knowledgeable in state management using Redux, **Redux Toolkit**, and **context API** to manage complex application states effectively. I am familiar with testing frameworks like **Jest** and React Testing Library to ensure code quality and reliability through **Unit and Integration tests**. Also committed to optimizing performance through **code-splitting**, **lazy loading**, **memoization**, and other best practices. I have experience in integrating RESTful APIs to fetch and manipulate data, ensuring smooth communication between the frontend and backend. I have built a scalable e-commerce platform with React, Redux, and integrated **payment gateways**, resulting in a seamless and secure shopping experience for users.
