About Me

Currently, I am working with a UFO Cine Media Network where I am wholly responsible for maintaining and securing digital data. Also responsible for day to day activity regarding data manipulation. I have done my Full Stack Developer course and have good knowledge of frontend and backend technologies. I have a strong passion for creating efficient, scalable, and user-friendly single page web applications. With a solid foundation in JavaScript and a deep understanding of the React ecosystem, I specialize in developing **responsive and optimized** applications that provide seamless user experiences. I am Knowledgeable in state management using Redux, **Redux Toolkit**, and **context API** to manage complex application states effectively. I am familiar with testing frameworks like **Jest** and React Testing Library to ensure code quality and reliability through **Unit and Integration tests**. Also committed to optimizing performance through **code-splitting**, **lazy loading**, **memoization**, and other best practices. I have experience in integrating RESTful APIs to fetch and manipulate data, ensuring smooth communication between the frontend and backend. I have built a scalable e-commerce platform with React, Redux, and integrated **payment gateways**, resulting in a seamless and secure shopping experience for users.

Skills & Abilities

Front-End Development:
React, Redux, Redux Toolkit, React Router, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Parcel, Hooks API, Context API

Back-End Development:
Node, Express, RESTful APIs, MongoDB, Mongoose, JWT

Deployment & Version Control:
NPM, Git, GitHub, GitLab

Testing & Performance:
Jest, Postman, Redux dev tools

Experience

Assistant Manager of Data Backup and storage

UFO CINE MEDIA NETWORK, Andheri (E)

- Develop and implement data backup policies and procedures.
- Schedule and monitor regular backups to ensure data is correctly archived.
- Manage backup software and hardware solutions.
- Oversee the storage infrastructure, including NAS, SAN, and cloud storage solutions.
- Ensure efficient data storage and retrieval processes.
- Monitor storage usage and plan for future capacity needs.
- Develop and test disaster recovery plans.
- Ensure that data can be restored quickly and accurately in case of data loss or corruption.
- Conduct regular recovery drills to verify the effectiveness of backup strategies.
- Implement security measures to protect data from unauthorized access and breaches.
- Ensure compliance with data protection regulations and industry standards.
- Maintain up-to-date documentation of backup and storage procedures.

Education

Bachelor of Commerce

Mumbai University   60%

Full Stack Web Developer (MERN)
